

COLLISION REPAIR AND REFINISHING TECHNOLOGY

ABOUT THIS PROGRAM

The Collision Repair and Refinishing Technology Program at CCCC prepares individuals to apply technical knowledge and skills to repair, reconstruct and finish automobile bodies, fenders, and external features. The program includes instruction in structural analysis, damage repair, nonstructural analysis, mechanical and electrical components, plastics and adhesives, painting and refinishing techniques, and damage analysis and estimating. It is offered at the Western Harnett Center, a newly constructed facility that includes classrooms, automotive bays, and a new paint booth, all with the latest state of the art technology.
